Dietary Recommendations for Clinical Patients After Diagnosis

Message from the Guest Editor

Dear Colleagues, Clinical nutrition is a very complex discipline, but from this complexity emerges a very simple summary, i.e., recommendations of what to eat in a specific clinical context. This new Special Issue of *Nutrients* called "Dietary Recommendations for Clinical Patients After Diagnosis" aims to answer a very simple question: "After making a specific diagnosis, what can I recommend to my patient to eat?". Often, answering this type of question requires complex knowledge, and this Special Issue of *Nutrients* would like to help confront this complexity. We welcome both original articles and reviews related to clinical nutrition, malnutrition, renal failure, food allergies, irritable bowel syndrome, artificial nutrition (parenteral nutrition, integration of commercial and natural foods), cardiovascular and other diseases, all other types of nutrition, and dietary recommendations for patients.

Guest Editor

Dr. Carlo Pedrolli

Dietology Unit, S. Chiara General Hospital, APSS, Trento, Italy

Deadline for manuscript submissions

15 April 2026

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
