Nutritional Management for Diseases-Related Malnutrition and Sarcopenia in Elderly People

Message from the Guest Editor

Disease-related malnutrition is one reason for poor outcomes in older adults. Disease-related malnutrition is caused by severe diseases with inflammation, such as cancer, heart failure, hepatic failure, kidney disease, collagen diseases, and so forth. Disease-related malnutrition is also caused by conditions without inflammation, such as stroke, neurodegenerative diseases, and so forth. Thus, older adults with comorbidities face nutritional issues. The goal of this Special Issue is to focus on the importance of management for disease-related malnutrition of older adults. The Issue welcomes dedicated articles such as systematic reviews, narrative reviews, intervention studies, and observation studies.

Guest Editor

Dr. Keisuke Maeda

Department of Geriatric Medicine, National Center for Geriatrics and Gerontology(NCGG), Obu, Japan

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
