Future Foods: Innovations Addressing Global Challenges in Health, Nutrition, Sustainability, and Ethics

Message from the Guest Editors

By 2050, the worldwide population will reach 9 billion, further increasing the already substantial global malnutrition burden, compounded by the anticipated ongoing decline in food production due to climate change. In this context, future foods (FFs) have the primary goal to address the abovementioned diet challenges with respect to human health, safety, and environmental. Biotechnology and genetic engineering, vertical, hydroponic, and insect farming, as well as meat cultivation and alternative food production technologies (3D food printing) have been recently implemented for the production of FFs.

FFs may affect the risk, occurrence, and symptoms of numerous diseases, but more trials are needed to assess their potential long-term benefits/damages. FFs may also provide essential nutrients in non-customary ways, potentially addressing nutritional deficiencies, thus promoting overall wellbeing. Therefore, it is imperative to assess the safety and quality of FFs through comparative studies with traditional foods. Food traditions, societal values, and the fair treatment of resources are non-negligible factors that may raise ethical concerns regarding the adoption of FFs.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
