

Special Issue

Effects of Macronutrient Intake on Liver-Related Diseases

Message from the Guest Editor

We invite you to submit your manuscript for a Special Issue of *Nutrients*: "Effects of Macronutrient Intake on Liver-Related Diseases". We would like to focus on the role of nutrients in the progression and prevention of liver-related diseases.

We particularly invite researchers who plan to publish results of meta-analyses, systematic reviews, and randomized control trials as well as those who plan to write interesting review papers in the area of nutrition, macronutrients, and liver-related diseases.

The liver-related diseases on which we wish to focus in this Special Issue are:

- (a) Diseases caused by infections (especially hepatitis A, B, or C);
- (b) Autoimmune hepatitis;
- (c) Liver cancer or bile duct cancer;
- (d) Inherited liver disorders such as hemochromatosis or Wilson's disease;
- (e) NAFLD;
- (f) Cirrhosis, especially malnutrition/sarcopenia patients with cirrhosis.

A Special Issue will focus on the introduction of supplementation or specific exclusions in the treatment of patients with NAFLD. Previous publications on the nutrition of these patients have highlighted benefits of feeding strategies using the restriction of specific food components or time restrictions.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
