

Special Issue

Maternal Obesity and Nutrients

Message from the Guest Editors

You are invited to submit proposals for manuscripts that fit the objectives and topics of this Special Issue on “Maternal Obesity and Nutrients”. Maternal obesity is increasing globally, impacting the health of women and their children. The objective of this proposed Special Issue on “Maternal Obesity and Nutrients” is to publish selected papers detailing aspects of nutrition that are important around the pregnancy period, specifically for women living with obesity. In particular, papers (reviews, public health, clinical or experimental studies) will be included that report maternal obesity and the role of specific nutrients on maternal, foetal, and longer-term health; clinical research targeting high-risk populations for nutritional deficiencies such as women living with multi-morbidity or who have had bariatric surgery; and public health research that specifically addresses well-established obesity and nutrition inequalities such as food insecurity in high income countries and low, middle income countries, or explores the role of health professionals and policy makers.

Guest Editors

Prof. Dr. Judith Rankin

Dr. Nicola Heslehurst

Dr. Laura Gaudet

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
