

## Special Issue

# From Mother to Child Health Flow: The Impact of Dietary Habits and Food Choices

### Message from the Guest Editor

The incidence of obesity and chronic disease is constantly increasing. Among the involved factors, there is evidence that exposure to an unfavourable environment in utero is associated with a significant increase of birth negative outcomes and the risk of later disease. Factors that adversely affect the gestational environment such as maternal diseases, nutrition, and exposure to food contaminants can alter fetal development, with persistent effects on health. This Special Issue aims to collect new insights from animal models and human studies about the impact of dietary habits and food choices of mothers on maternal health, birth outcomes, and long-term child health status.

### Guest Editor

Dr. Alessandro Leone

International Center for the Assessment of Nutritional Status (ICANS),  
Department of Food Environmental and Nutritional Sciences (DeFENS),  
University of Milan, Via Mangiagalli 25, 20133 Milan, Italy

### Deadline for manuscript submissions

closed (10 April 2020)

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
