Neonatal Short Bowel Syndrome: Nutritional Management and Research Directions

Message from the Guest Editor

Neonatal short bowel syndrome is a clinical condition that necessitates parenteral nutrition in order to sustain growth and development. It is the most common cause of intestinal failure in infants, and its incidence and prevalence are increasing. Short bowel syndrome in neonatal intensive care unit patients can result from various conditions, particularly intestinal atresia, gastroschisis, necrotizing enterocolitis, and intestinal volvulus. Even if the residual intestinal length has been correlated with adaptation and survival, the neonatal care improvement, the development of new strategies on parenteral nutrition, the prevention of intravenous infections, and surgical procedures have significantly increased the survival of infants with short bowel syndrome. Therefore, the prognosis of short bowel syndrome has been improving with advances in multidisciplinary intestinal care. The nutritional research directions on infants with short bowel syndrome have to limit the following clinical problems:

- Food avoidance
- Long term nutritional deficiency
- Micronutrients deficiency
- PN-liver failure

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain
