The Role of Nutrition in Neurological Disorders

Message from the Guest Editors

The overlap between nutrition and neurological disorders is evident. Specific diets might lead to neurological manifestations, worsen pre-existing neurological problems or protect from developing ones. In this Special Issue, we welcome papers focusing on the links between diet and nutrition and neurological disorders of any type. We welcome original papers, reviews and meta-analyses with a particular interest in the role of specific nutrients in the pathogenesis and the natural history of those disorders. These include, but are not limited to the following:

- Neurological disorders and vitamin deficiencies
- Neurological disorders and vitamin excesses
- Gluten related neurological disorders
- Lactose related neurological disorders
- Vegan diet and neurological disorders
- Vegetarian diet and neurological disorders
- Mediterranean diet and neurological disorders
