Nutrition in Liver Cirrhosis and Liver Transplantation

Message from the Guest Editors

Malnourished patients with cirrhosis are frequently at risk for micronutrient deficiencies; however, the evidence for micronutrient measurement and replacement are still lacking in the published literature. Nonalcoholic steatohepatitis (NASH) is a leading cause for liver transplantation. Patients with NASH cirrhosis face unique nutritional issues to the impact of both obesity and sarcopenia, which together escalate adverse clinical outcomes. We are excited to inform you of our Special Edition titled “Nutrition in Liver Cirrhosis and Liver Transplantation” for the journal *Nutrients*. We invite you to contribute either an original manuscript or review article to this Special Edition. We welcome submissions with a focus on nutrition screening, nutrition assessment, body composition, dietary therapies in cirrhosis, micronutrient monitoring and replacement, branched chain amino acids, preoperative nutritional therapy, the impact of obesity in cirrhosis, and the treatment of malnutrition in hospital in patients with cirrhosis and liver transplantation.

Guest Editors

Dr. Maitreyi Raman

Assoc. Prof. Dr. Puneeta Tandon

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
