Nutrition in Gynecologic Disease

Message from the Guest Editor

The pathologies concerning the gynecological organs are very varied and range from tumoral pathologies to hormonal dysfunctions. The benign and malignant disease include ovarian, endometrial, and cervical cancer, as well as gynecological benign diseases such as PCOS, endometriosis, and uterine leiomyoma. Epidemiological studies show that lifestyle like diet can be an important risk factor for gynecological diseases. The human diet contains a wide variety of plant-based foods that provide essential nutrients for the body. Besides, plant-based foods possess variety of non-nutritive components also benefit for health. This Special Issue welcome the latest knowledge regarding the nutrition therapy of gynecological diseases, which will offer valuable insight into how diet as a whole, nutraceuticals, nutrients, dietary patterns, phytochemicals, or other dietary components can serve as preventive and/or therapeutic compounds. Contributions regarding the utility of nutrients in the management of menopause, reproductive disfunction, and the obstetric outcomes are also welcome.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
