Nutrition and Growth of Preterm Neonates during Hospitalization: Impact on Childhood Outcomes

Message from the Guest Editors

Extrauterine growth delay in premature neonates is linked with adverse neurodevelopmental outcomes in later life. According to Barker's hypothesis, LBW neonates have increased risks of coronary heart disease, hypertension and type 2 diabetes in adult life. Very premature neonates lack optimal postnatal growth in their 'third trimester' of life, due to a combination of factors, including issues with feeding, gut immaturity and high energy requirements (RDS, infections, and rapid brain growth). As a result, the first few weeks after birth are characterised by a mismatch between the nutritional needs and nutritional intake of premature neonates, which is much more pronounced for the sickest neonates among them. Since the early 2000s, enteral and parenteral feeding policies have changed, in an effort to address the aforementioned problem. We aim for this Special Issue to include research and reviews pertaining to these controversies, and provide insights into the nutrition, growth charts and development of the whole spectrum of premature neonates, along with the effect of those on their childhood outcomes.

Guest Editors

Prof. Dr. Antonios K. Gounaris

Neonatal Clinic-NICU, University General Hospital of Larissa, 41222 Larissa, Greece

Dr. Rozeta Sokou

1. Neonatal Intensive Care Unit, "Agios Panteleimon" General Hospital of Nikea, 18454 Piraeus, Greece

2. Department of Neonatology, National and Kapodistrian University of Athens, 15772 Athens, Greece

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
