

## Special Issue

# The Role of Vitamin D in Inflammatory Diseases

### Message from the Guest Editor

Vitamin D is well known for its importance for the maintenance of skeletal health. Over the past several decades, we have recognized that vitamin D has a multitude of other biologic functions and that vitamin D deficiency has been related to a wide variety of acute and chronic illnesses. The goal of this special edition is to invite authors to submit manuscripts that relate to how vitamin D mechanistically is able to promote anti-inflammatory activity as well as report on associations and clinical trials that have demonstrated vitamin D's anti-inflammatory effects for acute and chronic illnesses. Since inflammation has been implicated in autoimmune disorders, cardiovascular disease, gastrointestinal disorders, lung diseases, mental illness, metabolic diseases including type 2 diabetes, neurodegenerative diseases, and some cancers, the authors will have wide latitude regarding the topic of their submission as it relates to the theme of this special edition, the anti-inflammatory activity of vitamin D.

### Guest Editor

Dr. Michael F. Holick

School of Medicine, Boston University, Boston, MA, USA

### Deadline for manuscript submissions

25 October 2025

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
