

Special Issue

Diet on Gut Health and Celiac Disease

Message from the Guest Editor

The incidence and prevalence of celiac disease is increasing worldwide. There is a growing recognition of the associated challenges with managing celiac disease as well as associated clinical conditions. Associated clinical conditions span the spectrum of bone health, micronutrients and vitamin deficiencies, and other immune-mediated conditions, including diabetes and thyroid disease. This issue aims to explore the potential role and possible effects of dietary components such as dietary fiber and prebiotics/probiotics on gut health and celiac disease. In addition, we will provide a comprehensive review of updated actions to ensure the quality of treatment, establishing a roadmap to excellent care.

Guest Editor

Dr. Kofi Clarke

Division of Gastroenterology and Hepatology, Graham H Jeffries
Professor of Medicine, Department of Medicine, Penn State College of
Medicine, Hershey, PA, USA

Deadline for manuscript submissions

30 September 2025

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
