

Special Issue

Dietary Strategies for the Prevention of Cancer

Message from the Guest Editor

Lifestyle and nutrition play critical roles throughout the cancer continuum; diet and dietary composition may increase or decrease the risk of cancer. As such, maintaining a healthy lifestyle, proper nutritional habits, and adequate dietary intake are of the utmost importance in cancer prevention and during treatment(s).

This Special Issue of *Nutrients*, entitled "Dietary Strategies for Prevention of Cancer", aims to inform our understanding on the relationship between diet and cancer. Our editorial board welcomes manuscript submissions examining the effects of diet, nutritional components, and varied body compositions as a result of diet and nutrition on the cancer continuum. Topics of interest include, but are not limited to, those mentioned above. Manuscripts employing unique techniques and approaches, such as the identification of novel biomarkers, cancer-centric signaling pathways that are linked to diet and nutritional choices, and distinct dietary patterns, are of particular interest. Epidemiological, interventional, and systematic reviews and meta-analyses are welcome for submission.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
