Special Issue

Effects of Diet and Nutrition on Chronic Kidney Disease (CKD) —"Greedy Kidney" in Health and Diseases

Message from the Guest Editors

The kidney is sometimes referred as an "aging clock", since a decline in kidney function faithfully reflects the aging of the whole body. The kidney is one of the most metabolically active organs. The renal proximal tubules are rich in mitochondria and are engaged in the reabsorption of nutrients and minerals, which requires a lot of ATP. When we consume a large amount of nutrients, the kidney functions to retain them within the body as much as possible.

We welcome any papers related to this Special Issue in the following aspects:

The mechanism/pathophysiology of CKD from nutritional and metabolic perspectives;

The nutri-genomics of CKD;

Dysbiosis and CKD;

Gastrointestinal symptoms, including constipation and CKD/cardiovascular events;

The significance of nutrition in the relationship between frailty, sarcopenia, and CKD;

Evidence related to nutritional interventions, including dietary fibers or plant-dominant low-protein diet.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluis Serra-Majem

- Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
- Research Institute of Biomedical and Health Sciences (IUIBS),
 University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
 Preventive Medicine Service, Centro Hospitalario Universitario
 Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA
