

## Special Issue

# Diet and Nutrition Approaches to Support Cancer Patients Post-Acute Active Treatment

### Message from the Guest Editors

Cancer treatment-related side effects can range from acute to chronic, which collectively reduce quality of life. The high prevalence of malnutrition and muscle loss in some tumour streams (i.e., upper gastrointestinal and head and neck) require early identification, referral and management from nutrition and other allied health services to prevent poor clinical outcomes occurring.

This Special Issue on the “Diet and Nutrition Approaches to Support Cancer Patients Post-Acute Active Treatment” will focus on all aspects regarding the acute management of people who have completed their cancer treatment. Researchers are invited to submit original research articles using any study design, including case studies, cross-sectional studies, implementation or interventional studies, cohort studies, and reviews and meta-analyses.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
