

## Special Issue

# Combining Artificial Intelligence for Nutrition Applications: Recent Advancements

### Message from the Guest Editors

As artificial intelligence gains momentum in scientific labs and industries worldwide, the potential benefits and power of AI for enhancing our daily lives have become increasingly apparent. The use of AI to enhance our understanding of nutrition and health has been gradually embraced by the nutrition and health community over the past decade, and this trend is still on the rise. As a cutting-edge advancement, can today's AI offer more value in terms of dietary nutrition and health for a deeper understanding? We are pleased to announce this Special Issue as a platform for a wide range of topics related to the integration of artificial intelligence for nutrition applications, will cover the intelligent collection of dietary nutrition and health information, intelligent analysis related to diet and nutrition, and intelligent recommendations for diet and nutrition, as well as providing intelligent solutions and tools for dietary nutrition, personalized nutrition and health management.
