## Update of Enteral Nutrition

### Message from the Guest Editors

Enteral nutrition aims to feed, through a functioning digestive tract, people with swallowing difficulties or total oral disability. In this way, it is possible to maintain or improve the nutritional status of patients in a situation of malnutrition, both in hospital and in their homes. It is the most frequent form of artificial nutrition and mainly affects patients with neurological and oncological diseases who need it for long periods of time, even for their lifetime. Even if, apparently, this nutritional treatment has remained unchanged for the last years, in fact, it has been undergoing changes regarding the enteral feeding devices, ingredients used, innovative practices, safe administration, and reimbursement policies. We invite you to submit articles on enteral nutrition that meet the goals of this Special Issue.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
