

## Special Issue

# Vitamin D Deficiency and Supplementation in Human Metabolic Diseases

### Message from the Guest Editors

Vitamin D is an important steroid hormone for human health. There are many risk groups for vitamin D deficiency in the general population, specifically in patients with chronic diseases. In this Special Issue, we are looking for original reports, systematic reviews, meta-analyses, cost-effectiveness analyses, and even extraordinary case reports on the topic of vitamin D deficiency and supplementation in human metabolic diseases (including, but not limited to, prediabetes, metabolic syndrome, obesity, hypo- and hyperparathyroidism, and thyroid disease). We are also interested in effect size analyses, public health strategies, and fortification strategies across the globe and are looking forward to receiving high-quality submissions that will undergo a fair but strict review process.

---

### Guest Editors

Dr. Karin Amrein

Dr. Astrid Fahrleitner-Pammer

Dr. Christina Geiger

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
