

## Special Issue

# Mechanisms of Beneficial Action of Phytochemicals in Alzheimer's Disease

### Message from the Guest Editor

Alzheimer's disease (AD), which is characterized by the presence of amyloid plaques and neurofibrillary tangles accompanied by neurodegeneration, is the most common form of dementia among the elderly. It is widely accepted that phytochemicals exert a wide range of beneficial effects against the pathological features of AD, such as amyloid beta pathology, hyperphosphorylation of tau, and oxidative stress. The objective of this Special Issue is to collect recent findings regarding the mechanisms of beneficial action of phytochemicals and phytochemical-rich plant extracts against AD. We encourage the submission of original research studies in in vitro cell culture models and in vivo animal models of AD. Review articles are also welcome.

### Guest Editor

Prof. Dr. Akira Nakajima

Applied Biology and Food Sciences, Faculty of Agriculture and Life Science, Hirosaki University, 3 Bunkyo-cho, Hirosaki, Aomori 036-8561, Japan

### Deadline for manuscript submissions

closed (15 July 2024)

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
