

## Special Issue

# Nutritional Support and Care for Pediatric Gastroenterology

### Message from the Guest Editors

Optimal nutritional support plays a fundamental role in the management of pediatric gastrointestinal (GI) disorders, influencing both short- and long-term clinical outcomes. Children with conditions such as inflammatory bowel disease (IBD), celiac disease, eosinophilic esophagitis (EoE), and functional GI disorders face complex nutritional challenges that require individualized and multidisciplinary care. This Special Issue aims to explore evidence-based approaches to nutritional assessment, intervention, and long-term monitoring in pediatric gastroenterology. Topics of interest include enteral nutrition, therapeutic diets, the role of gut microbiota, caregiver education, and global disparities in care. We welcome the submission of original research, reviews, clinical case studies, and practice guidelines to enhance our understanding and promote comprehensive, patient-centered nutritional support for children with GI diseases.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
