Acute Malnutrition in Children Living in Low-Middle Income Countries and Marginized Populations

Message from the Guest Editor

Child malnutrition is still a public health priority and a worldwide major concern. Children affected by acute malnutrition are most exposed to a vicious cycle of infectious diseases and growth faltering. The goal of this Special Issue is to focus on the global burden of acute malnutrition in low-middle-income countries, but also in unserved populations living in developed countries. We would like to focus on the multi-factors at the root level for child malnutrition, from food insecurity to eating habits, and from access to dietary diversity to health services. Specifically, the aim of this Special Issue is to highlight the nutrition epidemiology of malnutrition in different areas of the world, identifying its risk factors and investigating national health services and community programs already implemented in the field to fight this public health concern. This information will provide more evidence-based results for improving the health and nutrition care of children, accelerating the process to hit the target of zero hunger, leaving no one behind.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
