Nutritional Bioactive Compounds and Diabetic Neuropathy

Message from the Guest Editor

Diabetes mellitus is a true social and health problem throughout the world. Approximately 460 million people suffer from diabetes mellitus. Long-term complications involve the vascular system, both in arteries (macroangiopathy) and in small vessels (diabetic microangiopathy), among which are those of the retina, kidney and nervous tissue (diabetic neuropathy). Diet is not only useful to control blood glucose levels, but it is also a source of antioxidant compounds, which have been shown to be effective in preventing cardiovascular disease, including type 2 diabetes mellitus. In this Special Issue, we encourage investigators to contribute original research and review articles that address biochemical, functional and clinical evidence, which provide a greater understanding of the role that various nutrients can play in the pathophysiology and evolution of diabetic neuropathy.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
