

## Special Issue

# Chinese National Nutrition Survey 2012

### Message from the Guest Editor

China is undergoing rapid nutrition transition and is facing an epidemic of diabetes and other chronic diseases. The Chinese government has put a great effort into the monitoring of change of food consumption and burden of non-communicable chronic diseases, which is shown by the implementation of the National Nutrition Survey in 1959, 1982, 1992, 2002, and 2012. This Special Issue will welcome original research using data from the 2012 Chinese National Nutrition Survey. Manuscripts can either describe the dietary intake (nutrients, foods, and overall dietary patterns), lifestyle and burden of chronic diseases or assess the association between dietary intake/lifestyle and chronic diseases.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
