Medical Nutrition Therapy in Critically Ill and COVID-19 Patients

Message from the Guest Editors

Nowadays, medical nutrition therapy of critically ill patients is an indispensable element of holistic intensive care therapy but remains also a challenge. Proper planning of nutrition support, taking into account the appropriate route of administration, as well as estimating energy and nutritional needs can significantly improve the patient's prognosis and outcomes, especially during COVID-19 pandemic, which has posed a huge healthcare, social and economic impact worldwide during the past few months. Most of the published guidelines from various international organizations state that there is an urgent need regarding data on optimal nutritional approach for critically ill patients. Therefore, we would like to invite authors to contribute original research articles as well as review articles focused on malnutrition risk, diagnosis and medical nutrition treatment in critically ill and COVID-19 patient and their impact on clinical outcomes in everyday clinical setting.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
