

## Special Issue

# Diet, Dyslipidemias and Metabolic Diseases

### Message from the Guest Editor

I was recently invited by the journal *Nutrients* to coordinate a Special Issue dedicated to “Diet, Dyslipidemias, and Metabolic Diseases”. This is a particularly hot topic at present due to the increase in morbidity, mortality, and health costs associated with these pathologies, especially when it comes to young people and in combination with the other problems they face. In this Special Issue, I believe it would be useful to highlight the problems of early identification of nutritional errors and disorders, laboratory and genetic tests for the identification and follow-up of what must be considered a real pathology, to continue with the description and the proposal of the interventions to be implemented for the resolution of the problem. Obviously, the current situation regarding drugs available and those under experimentation is also important, and papers on this are also welcome.

### Guest Editor

Prof. Dr. Roberto Verna  
Systems Biology Group Lab, Sapienza University, 00160 Rome, Italy

### Deadline for manuscript submissions

closed (31 October 2022)

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
