Fatty Acids in Obesity and Type 2 Diabetes

Message from the Guest Editor

It has long been known that lipid metabolism is impaired in obesity and type 2 diabetes, however, the effect of specific fatty acids is still hotly debated. It is clear that not all fatty acids within a particular class are equal with regard to metabolic function and this Special Issue “Fatty Acids in Obesity and Type 2 Diabetes” welcomes review or original articles that advance our knowledge in this field. Articles that address the fact that fatty acids are not consumed in isolation, but in the context of complex foods would be particularly appreciated. Dr. Barbara Fielding

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem
