Food Sensitivity: Causes and Management

Message from the Guest Editor

Food hypersensitivities include allergic (IgE-dependent and IgE-independent food allergies) and non-allergic (lactose, histamine, salicylate or synthetic additives intolerance, coeliac disease, non-coeliac gluten intolerance) disorders. Such disorders occur not only among infants and children but also among adults. Treatment involves elimination diets, which can lead to nutritional deficiencies and malnutrition as well as feeding disorders in children. The aim of this Special Issue of *Nutrients* on "Food Sensitivity: Causes and Management" is to provide information on different forms of food hypersensitivity and different ways of conducting elimination diets. We are in papers covering topics from anaphylactic conditions requiring full elimination of even trace amounts of food to IgE-dependent allergies to milk or egg, in which some patients can be given these products in a baked form.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain
