

Special Issue

Fortification of Human Milk in the Neonatal Intensive Care Unit

Message from the Guest Editor

This special issue is dedicated to fortification of human milk in the NICU. In particular, we are interested in assessing the association between fortification of mother's own milk and/or donor human milk and in-patient clinical outcomes, discharge outcomes, and/or long-term growth and/or neurodevelopment outcomes. Studies of interest for this special issue should include exposures of standard fortification, adjusted fortification, targeted fortification, or a combination of fortification methods. Given that fortification protocols are specific to each institution, we appreciate detailed information on fortification processes and any measurements of human milk prior/post fortification.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief
