

Special Issue

Nutrition and Functional Abdominal Pain

Message from the Guest Editors

The worldwide pooled prevalence of functional abdominal pain disorders (FAPDs) in pediatrics is 13.5%. FAPDs account for up to 75% of all pediatric gastroenterology consultations. The Rome IV criteria classifies these as functional dyspepsia, irritable bowel syndrome, abdominal migraine and functional abdominal pain - not otherwise specified. The role of nutrients in functional abdominal pain disorders is an active area of research. This special issue will focus on the latest evidence on the treatment of functional abdominal pain disorders in children in relation to:

- Obesity
- Cow's milk protein allergy
- Gluten
- Disaccharidases deficiency
- Fiber
- Low FODMAP diet
- Probiotics
- Herbs and Spices
- Eating behaviors

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez
