

## Special Issue

# Gene, Diet, Inflammation and Gut Health

### Message from the Guest Editors

Emerging studies have revealed complex interactions involving human genetics, the diet, and gastrointestinal health. This interplay of factors has already been demonstrated in several conditions, such as irritable bowel syndrome, inflammatory bowel disease, liver disease, and obesity. To highlight the importance of this area of research, *Nutrients* has planned a Special Issue titled “Gene, Diet, Inflammation and Gut Health”. This Special Issue focuses on original research and narrative reviews that relate to nutrigenetics and nutrigenomics and how they influence gut health. I am delighted to invite you to contribute an article to this Special Issue.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
