

# Special Issue

## Nutrition and Allergic Diseases

### Message from the Guest Editors

The purpose of this Special Issue, “Nutrition and Allergic Diseases”, is to provide an overview of the role of nutrition in allergy. The prevalence of asthma, rhinitis and food allergy has increased tremendously over the last few decades. Is there a role for nutrition to help managing this global challenge? This Special Issue will touch upon the many aspects that relate to nutrition and allergy, and focuses on two fundamental questions: 1) Can nutrition play a role in allergy prevention and induction? 2) Can nutrition play a role in managing allergies? The topics covered should range from epidemiology of nutrition and allergy prevalence, through breastfeeding, microbiota, food allergy, immunotherapy approaches for food allergy, early introduction of food components, food processing, and known effects of food components on allergy. Professor Joost van Neerven

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
