# Nutrigenetics and Nutrigenomics from Research to Practice

### Message from the Guest Editors

The goal of this Special Issue, "Nutrigenetics and Nutrigenomics from Research to Practice. An upload", is to focus on the application of nutrigenomics as part of personalized nutrition recommendations, based on the knowledge of an individual's genetic profile to evaluate changes in dietary behaviour and body composition. This new information will provide health care professionals with widespread, clear and updated evidence to provide a valuable overview of nutrigenetics and nutrigenomics, which helps to translate research into practice.
