Nutritional Supplementation in People with HIV

Message from the Guest Editor

Since the very beginning of the AIDS epidemic, it became clear that HIV infection damages the gut and elicits nutritional deficits. Subsequently, nutritional supplementation has been pursued as a strategy to enhance immune reconstitution and to target persistent immune defects. The goal of this Special Issue, “Nutritional Supplementation in People with HIV”, is to gain understanding on the biological and clinical effects of nutritional supplementation in people with HIV with prebiotics, probiotics, oligonutrients, or other interventions targeting the microbiota on the immune system and clinical outcomes. Specifically, the aim is to clarify if nutritional intervention can influence gut microbiota composition, function, and host-interaction, favoring human health and preventing diseases. This new Special Issue will provide health care professionals with widespread, clear and up-to-date evidence on nutritional interventions in HIV care.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez
