

Special Issue

Front-of-Pack Nutrition Label and Public Health

Message from the Guest Editors

The purpose of this Special Issue, “Front-of-Pack Nutrition Label and Public Health,” is to provide an update of the scientific data pertaining to various front-of-pack nutrition-labels implemented (or currently adopted or currently under discussion) in different countries of the world, through studies conducted on both the nutrient profiling system underlying FOP nutrition labels, and on the graphical design of the labels. This Special Issue will also discuss FOP nutrition labels as a public health tool, the potential impacts of FOP nutrition labels and/or nutrient profiling systems on food purchases, dietary intakes and health status of populations (observational epidemiological studies, modelling studies, etc.), and food composition (reformulation and innovation). Finally, the potential role of stakeholders (namely lobbies or consumer associations), and the political process leading to the selection or rejection of FOP nutrition labels within the framework of nutrition policies will also be discussed.

Guest Editors

Dr. Serge Hercberg
Dr. Pilar Galan
Dr. Chantal Julia

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem
