

## Special Issue

# The Effect of Vitamin D on Metabolic Bone Disease and Chronic Diseases

### Message from the Guest Editors

Bone formation and bone remodeling are complicated processes, regulated by systemic hormones and paracrine factors, which regulate calcium and phosphate fluxes and cellular differentiation. An understanding of these important regulators of bone metabolism is vital to understanding clinical disorders, as they are related to alterations in vitamin D metabolism and metabolic bone disease. Specific disorders of vitamin D metabolism can be related to the clinical disease states of aging and gastrointestinal, renal and hepatic disease. Epidemiologic evidence and prospective studies have linked vitamin D deficiency with an increased risk of many chronic diseases, including autoimmune diseases, cardiovascular diseases, diabetes and infectious diseases. The aim of this Special Issue is to update the role of vitamin D in bone metabolism, with a focus not only on common bone disorders, such as osteoporosis and Paget's disease of bone, but also in the various forms of renal osteodystrophy of chronic kidney disease—mineral and bone disorder (CKD-MBD)—and in rare bone disease. We are soliciting original papers, review articles, as well as case reports.

---

### Guest Editors

Dr. Daniela Merlotti

Researcher, Department of Medicine Surgery and Neurosciences, University of Siena, Siena, Italy

Prof. Dr. Salvatore Minisola

Department of Medical and Cardiovascular Sciences, "Sapienza" Rome University, 00161 Rome, Italy

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

### Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
