Recent Advances in Eating Pathologies in At-Risk Populations

Message from the Guest Editor

Several populations are at increased risk of developing eating disorders or food-related pathologies. This Special Issue seeks to examine the contributing factors, neural mechanisms, novel effective therapeutic strategies, and efforts to mitigate environmental and genetic risks for development of disordered eating. At-risk populations include but are not limited to those with a family history of eating pathology, intermittent dieting, weight control issues, food biases, body image issues, and military service history. Original research, methods, systematic reviews, and perspective papers are welcome. Relevant animal studies are also welcomed.

Guest Editor

Dr. Nicholas Bello

Rutgers, The State University of New Jersey, Piscataway, NJ, USA

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Nobuyuki Takahashi

Laboratory of Physiology and Metabolism, Department of Food Safety and Nutritional Science, Faculty of Applied Bioscience, Tokyo University of Agriculture, Tokyo, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
