

Special Issue

How to Prevent Obesity and Inflammatory Disease 2022

Message from the Guest Editor

Obesity is the most prevalent metabolic disease, and new approaches to solving obesity are required to prevent the rise in inflammatory diseases. Within the framework of this Special Issue, the submission of both original research manuscripts and review articles is encouraged; these articles should focus on how changing lifestyles, eating habits, and the right mindset can prevent or treat these diseases. Articles focusing on the different aspects (gastrointestinal tract, brain, liver, adipose tissue, bone, etc.) related to obesity and inflammatory diseases, as well as how and to what extent these organs interact at cellular and system levels, are very welcome.

Guest Editor

Dr. Sara Baldassano

Dipartimento di Scienze e Tecnologie Biologiche Chimiche e Farmaceutiche, Università degli Studi di Palermo, 90133 Palermo, PA, Italy

Deadline for manuscript submissions

closed (20 July 2023)
