

Special Issue

How to Prevent Obesity and Inflammatory Disease 2024

Message from the Guest Editor

Obesity is the most prevalent metabolic disease. New approaches are necessary to prevent the rise in inflammatory diseases. For this Special Issue, we are interested in both original research manuscripts and review articles looking at how changing lifestyle, eating habits, and mindset can prevent or treat these diseases. Articles focusing on the different areas (gastrointestinal tract, brain, liver, adipose tissue, bone, etc.) involved in obesity and inflammatory disease and how and to what extent these interact at the cellular and system levels are welcome.

Guest Editor

Dr. Sara Baldassano

Dipartimento di Scienze e Tecnologie Biologiche Chimiche e Farmaceutiche, Università degli Studi di Palermo, 90133 Palermo, Italy
