submissions:

closed (10 January 2025)

Message from the Guest Editors

We are pleased to announce a Special Issue of high quality “Feature Papers of Oceans 2024”. *Oceans* is an international, open access, cross-disciplinary science journal. It promises a superior peer review, rapid publication, and high visibility in an advanced forum, bringing together diverse studies on all aspects of oceanography, including marine biology, chemistry, physics, and geology.

We welcome manuscripts from all areas of marine science that will be of interest to international readers. This includes all the topics within the physical and life sciences, environmental and earth sciences, and marine conservation and sustainable development. Additional topics include ocean engineering, governance, and modeling.

We welcome submissions from the Editorial Board Members and scholars invited by the *Oceans* Editorial Board and Office, and we encourage high-quality manuscripts with excellent data. Original research articles and comprehensive review papers are welcome. The prospective authors are encouraged to send short proposals for submissions of Feature Papers to our Editorial Office (oceans@mdpi.com) for evaluation.
