

Special Issue

Coral Reef Ecology and Biology

Message from the Guest Editors

The *Oceans* journal is about to launch a Special Issue dedicated to coral reef ecology and biology.

This *Special Issue* is committed to publishing multidisciplinary papers focused on coral reefs, the most biodiverse and productive type of marine ecosystem. Submitted manuscripts should be original research articles focused across the broad fields of: coral reef science; community ecology; the functional ecology of coral reef and reef organisms; eco-physiological approaches to understanding organism and system responses to local, regional and global changes or stressors; evolution and phylogenetics of coral as a holobiont considering associated reef organisms; coral reef management and policies; and rehabilitation tools for mitigating reef degradation.

We look forward to receiving your contributions.

Guest Editors

Dr. Alma Paola Rodriguez-Troncoso
Dr. Adolfo Tortolero Langarica
Dr. Rafael Andrés Cabral-Tena

Deadline for manuscript submissions

closed (15 February 2024)

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GEOBASE,
AGRIS, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 35 days after
submission; acceptance to publication is undertaken in 8.6
days (median values for papers published in this journal in
the second half of 2025).

Journal Rank:

CiteScore - Q2 (Oceanography)
