

## Special Issue

# Endonasal Endoscopic Surgery: What Can We Do?

### Message from the Guest Editor

Dear colleagues, Since the development of the rigid telescope, endonasal surgery has evolved a lot. Traditionally sinus surgery was performed via an open approach. Since the last decades, many procedures can be done endonasally under endoscopic control. This kind of surgery gives actually excellent results with very low morbidity and quicker rehabilitation. The aim of this issue is to overview different surgical procedures performed endoscopically through the nose; This concerns either congenital disease, benign or malignant disease, and inflammatory process. We welcome to this special issue all the contributors that are experts in this kind of surgery.

### Author Benefits

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.5 days after submission; acceptance to publication is undertaken in 3.2 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
