Vestibulopathies: Latest Research and Applications

Message from the Guest Editor

Vestibulopathy (VP) implies abnormality in the vestibular system, especially in the peripheral vestibular system. VP can be acute or chronic and unilateral or bilateral. Among VPs, there are difficulties in the treatment and care of patients with chronic bilateral VP. While the Barany Society has established the diagnostic criteria of bilateral vestibulopathy (BVP), there are many patients with bilateral vestibular dysfunction who do not meet the criteria of BVP. Coping with bilateral vestibulopathy is challenging. This Special Issue, "Vestibulopathies: Latest Research and Applications", will focus on this timely subject and discuss its pathophysiology and treatment. I hope that many clinicians and scientists will be interested in this subject. With best wishes,

Guest Editor

Prof. Dr. Toshihisa Murofushi

Department of Otolaryngology, Teikyo University School of Medicine, Mizonokuchi Hospital, Kawasaki 213-8507, Japan

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Agnieszka Szczepek

Department of Otorhinolaryngology, Head and Neck Surgery, Charité
Universitätsmedizin, Berlin, Germany

Author Benefits

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.5 days after submission; acceptance to publication is undertaken in 3.2 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
