

Special Issue

Feature Papers in Optics

Message from the Guest Editors

This Special Issue of *Optics* will be comprised of a collection of top-quality papers published free of charge in open access form by Editorial Board Members, or those invited by the editorial office and the Editors-in-Chief. The papers should be long research papers (or review papers) with a full and detailed summary of the author's own work completed so far.

About the Journal

Message from the Editorial Board

Optics (ISSN 2673-3269) aims at establishing *Optics* as a leading journal for publishing high impact fundamental research and applications in optics field with a fast processing time and high quality service. The journal particularly welcomes both theoretical (simulation) and experimental research within our journal's scope. We encourage scientists to publish their experimental and theoretical results in as much detail as possible. So, there is no restriction on the length or pages of the papers. The full experimental details must be provided so that the results can be reproduced. Electronic files and software regarding the full details of the calculation or experimental procedure, if unable to be published in a normal way, can be deposited as supplementary electronic material.
