

Topical Collection

Digital Dentistry: State of the Art and Future Perspectives

Message from the Collection Editors

Digital technologies are reshaping dental practice. With new materials, new application procedures, and clinical protocols, they are widening the available options for oral rehabilitation. Digital dentistry is constantly contributing to the standardization and quality improvement of dental treatments, facilitating the effectiveness and efficiency of dental offices and laboratories. Transforming all options made available by digital dental technologies into an opportunity to make oral rehabilitation affordable for patients while keeping profitability in mind for oral healthcare providers may be boosted by the dissemination of the current state of the art and research for future applications. As such, the aim of this topical collection is to promote knowledge sharing regarding what is immediately applicable to clinical practice and the current issues or challenges that ongoing or future research can address.

About the Journal

Message from the Editor-in-Chief

Oral is an official, peer-reviewed publication from MDPI, which deals with the key issues of oral health and its related fields. It allows for the dissemination of scientific research focused on emerging problems in the fields of dentistry and oral health, providing a forum to promote scientific information. Indeed, the need to face emerging problems, such as the progressive aging of the population and the impact of technological progress on healthcare, represents some pillars on which to build novel therapeutic strategies in the field of dentistry. *Oral* provides a great opportunity to contribute to progress in the field of oral health through the distribution of high-quality articles

Editor-in-Chief

Prof. Dr. Giuseppina Campisi

Department of Rehabilitation, Fragility and Continuity of Care, Unit of Oral Medicine, University Hospital Palermo, 90127 Palermo, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 9.9 days (median values for papers published in this journal in the first half of 2025).
