Editorial Board Members' Collection Series: Oral Health Management for Special Care Patients

Message from the Guest Editors

Special care in dentistry, such as dentistry for children in medical care, dentistry for patients with disability, dentistry for medically compromised patients, and dentistry for geriatric patients, is a less-explored topic that has been attracting increased interest from various professionals in recent years. Successfully applied dental techniques and improved oral healthcare for patients who need special care will assist professionals in performing dental care safely and securely.

Dentistry in cancer patients, both those currently undergoing cancer treatment and those in the post-treatment phase, to manage either oral toxicity caused by cancer treatment or dental and periodontal problems, is an increasingly important topic in the field of special care in dentistry.

The aim of this Topical Collection is to provide information about the current status of oral health management for special care patients, including outpatient dental care, dental treatments under general anesthesia and during home visits or visits to facilities such as nursing homes, to professionals who provide oral healthcare for patients needing special care.

About the Journal

Message from the Editor-in-Chief

Oral is an official, peer-reviewed publication from MDPI, which deals with the key issues of oral health and its related fields. It allows for the dissemination of scientific research focused on emerging problems in the fields of dentistry and oral health, providing a forum to promote scientific information. Indeed, the need to face emerging problems, such as the progressive aging of the population and the impact of technological progress on healthcare, represents some pillars on which to build novel therapeutic strategies in the field of dentistry. *Oral* provides a great opportunity to contribute to progress in the field of oral health through the distribution of high-quality articles

Editor-in-Chief

Prof. Dr. Giuseppina Campisi

Department of Rehabilitation, Fragility and Continuity of Care, Unit of Oral Medicine, University Hospital Palermo, 90127 Palermo, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.7 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the second half of 2025).
