

## Topical Collection

# Medication-Related Osteonecrosis of the Jaw (MRONJ): Current Practice, New Tools and Future Trends

### Message from the Collection Editors

Medication-related osteonecrosis of the Jaw (MRONJ) is an adverse drug reaction described as the progressive destruction and death of bone that affects the mandible and maxilla of patients exposed to the treatment with medications known to increase the risk of disease, in the absence of a previous radiation treatment.

This Topical Collection is focused on, but not limited to, advances and innovations in MRONJ treatment highlighting novel surgical approaches or devices and outcomes of clinical management protocols.

We invite you to submit high-quality original research articles or reviews that provide new findings on MRONJ extending the current state of knowledge. All manuscripts will be peer-reviewed by experts in the field.

## About the Journal

### Message from the Editor-in-Chief

*Oral* is an official, peer-reviewed publication from MDPI, which deals with the key issues of oral health and its related fields. It allows for the dissemination of scientific research focused on emerging problems in the fields of dentistry and oral health, providing a forum to promote scientific information. Indeed, the need to face emerging problems, such as the progressive aging of the population and the impact of technological progress on healthcare, represents some pillars on which to build novel therapeutic strategies in the field of dentistry. *Oral* provides a great opportunity to contribute to progress in the field of oral health through the distribution of high-quality articles

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within ESCI (Web of Science), Scopus and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 9.9 days (median values for papers published in this journal in the first half of 2025).
