

Special Issue

Recent Advances in Selective Oxidation

Message from the Guest Editor

Selective oxidation is a fundamental chemical process designed to target and transform a specific part of a molecule into a more valuable oxidized product, while intentionally leaving other reactive parts of the molecule unchanged. It is a cornerstone of the modern chemical industry and its products are essential building blocks for countless downstream products, such as intermediates, solvents, agrochemicals, and pharmaceuticals. Owing to the poor controllability of oxidation reactions, the pursuit of efficient and selective oxidation methods continues to be a formidable challenge in synthetic chemistry. This Special Issue aims to showcase cutting-edge research and comprehensive reviews in the field of selective oxidation. It is designed to provide readers with a valuable resource for the latest advancements and insights on this topic.

About the Journal

Message from the Editor-in-Chief

Organics is a new open-access journal that offers rapid dissemination of innovative, informative, and impactful results in every aspect of organic chemistry, with a particular emphasis on new or significantly improved research results in the field of organic chemistry. The aim of this journal is to encourage scientists to publish their experimental and theoretical results in great detail to facilitate the advancement of organic chemistry. Sample research topics that span the journal's scope are organic synthesis, synthetic methodology, theoretical organic chemistry, physical organic chemistry, supramolecular and macromolecular chemistry, heterocyclic chemistry, organocatalysis, bioorganic chemistry, organometallic chemistry, functional organic materials, etc. We are flexible with the types of manuscripts accepted, including original research articles, short communications, highlights of new developments and insightful critical reviews.

Editor-in-Chief

Prof. Dr. Wim Dehaen

Molecular Design and Synthesis, Department of Chemistry, KU Leuven,
Leuven Chem&Tech, Celestijnenlaan 200F, B-3001 Leuven, Belgium

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 36.3 days after submission; acceptance to publication is undertaken in 5.2 days (median values for papers published in this journal in the first half of 2025).
