

## Special Issue

# Current Trends in Sports Medicine Based on Orthopedics and Osteology

### Message from the Guest Editor

The field of sports medicine is growing at a rate that outpaces all other sub-specialties in orthopedics. The journal *Osteology* would like to take this opportunity to invite young surgeons and researchers to share their knowledge, research, questions, and techniques relative to sports medicine in order to help advance the field of sports medicine.

- sports medicine
- orthopedic surgery
- athletic injury
- knee instability
- shoulder instability
- trauma
- pain management
- ligamentous reconstruction
- extremity injury
- rehabilitation
- return to play
- fracture care

## About the Journal

### Message from the Editor-in-Chief

The field of osteology is rapidly evolving. Recent discoveries have transformed our understanding of bone metabolism, healing mechanisms, and the management of skeletal disorders. A deeper insight into the biological and clinical processes underlying bone repair and regeneration offers new opportunities to enhance patient care and therapeutic strategies.

*Osteology* was established with this vision in mind. *Osteology* is an international, peer-reviewed, open access journal dedicated to basic and clinical research in bone science, published quarterly online by MDPI. Supported by a dynamic scientific community, the journal is committed to excellence through a rigorous and transparent peer-review process.

We invite researchers worldwide to submit high-quality clinical and experimental studies to advance innovation and knowledge in osteology.
