Current Trends in Foot & Ankle Surgery

Message from the Guest Editor

Foot and ankle surgery is a relatively new speciality. The first gathering of surgeons with an interest in this began in 1969. Since then, advances in foot and ankle surgery have outpaced advances in other specialties as the available space to grow is larger. Osteology would like to take this opportunity to invite young surgeons and researchers to share their knowledge, research, questions, and techniques relative to foot and ankle surgery, in order to help all of us move forward in advancing patient care.
